

CANONICAL ENTRY 67 / 74

Stuttering

Neurologic

CANONICAL SOURCE - VERBATIM

Reduction of the tendency of the body to oversupply energy to the vocal cords is required. The connections for the auditory as well as the vocal forces of the body derive their impulse from the 3rd cervical, as well as the 3rd, 4th, and 5th dorsal. Correct the subluxations and pressures along the spine, and ensure a good and patient attitude.

Therapy:

- 2-3 osteopathic adjustments per week until resolved (adequate adjustments are necessary, lest the problem recur)
- Spinal massage with peanut oil
