

CANONICAL ENTRY 61 / 74

PYORRHEA

Oral health

CANONICAL SOURCE - VERBATIM

The action of this particular bacilli is first finding a site for growth and multiplication, either by invasive action or by predisposing conditions. The organism has the same shape of a bedbug but with larger legs.

Therapy:

- Massage gums thoroughly and vigorously with a liberal quantity of ipsab, rinse with an undiluted solution of Glyco-Thymoline and then with water thereafter
- Brush teeth each evening with combination of equal parts salt and baking soda.
- Enlightened Athletics Dietary Protocol with a large raw salad each day
